PARTNERSHIP PACKAGE CATALOGUE 2026

ABOUT SUSTAINABILITY SOLUTIONS EXCHANGE (SSX)

Sustainability Solutions Exchange (SSX) is the country's first platform promoting sustainable practices, resources, and technology to the world's essential industries. SSX is in the service of MSMEs across various export sectors that seek to start or continue their journey toward a circular economy, supporting the country's commitment to the Sustainable Development Goals (SDGs).

We believe that sustainability is the new standard for global trade. Our mission is to curate a space where ethical sourcing, circular economy principles, and sustainable manufacturing come together to reshape the future of business.

This year, SSX is doubling its impact in 2026 with a two-phase rollout designed to scale Philippine sustainable enterprises:

- **May 21-23 (World Trade Center):** SSX debuts as a specialized feature of IFEX Philippines, bridging the gap between global food trade and environmental stewardship.
- **October 15-17 (Philippine Trade Training Center)** The momentum culminates in a full-scale showcase, featuring an expanded exhibition and business matching with home, fashion, lifestyle sectors, and a 2-day conference.

From strategic integration to a dedicated grand stage, join us in shaping the future of sustainable and ethical trade.
